# iTEC 4000 Features & Specs

*FREE leasing options!*

[Watch Informative Video](#)

The iTEC 4000 is designed to improve indoor air quality by dealing with pollutants in a proactive way. This air and surface purifier combines four different technologies to synergistically reduce contaminants in the air and on surfaces and uses an enhanced ionization output representing the newest generation of proactive air and surface purification. It is completely safe in all inhabited areas, and effectively destroys mold, mildew, bacteria, viruses, odors and volatile organic compounds (VOCs) in the air and on surfaces. The iTEC 4000 air purifier also includes scalable ozone plates for "away mode" sanitization providing an extra level of cleaning in contaminated environments. When used as part of a holistic solutions protocol, PCO (Photo Catalytic Oxidation) provides a comfortable indoor air environment.

**InspiredTEC, LLC**  
*Technologies for Environmental Conditioning*

### SPECIFICATIONS

**NO Ozone PCO cell to provide catalytic ionization proactive processes, scalable ozone, when wanted and in "away mode", produces up to 360 mg/hr.,**  
**Electrical: 100V-240V/50-60Hz 45W, Operational anywhere in the world Ion Generation: 1 million/cm<sup>3</sup>, Coverage under normal contaminated conditions 4000 sq. ft.**  
**ELECTRICAL APPROVALS: UL, CE, PSE, TUV, EK (Korean), RoHS Compliant**

### MAIN FEATURES

**PCO (Photo Catalytic Oxidation) - Concentrated Cluster Ionization – Completely Safe for Humans and Pets, Removes VOCs, Odors, Bacteria, Viruses, Mold and Particulates Including Smoke, Five fan speeds with variable frequency drive for quiet operation Needlepoint and RF ion generator to reduce dust and particulate counts Intelligent maintenance reminders and "sleep mode" LED panel dimming, Full function remote control and low energy consumption for 24 hour/day operation, Easy Maintenance -- Replaceable PCO cell and Ozone Plates to maintain peak performance, 1 Year Limited Manufacturer Warranty**
