

Inspired TEC Interventec

Inspired TEC Interventec is designed to control bacteria, viruses, mold and VOC's in the air and on surfaces for large industrial spaces that are not controlled by HVAC. The Interventec unit is a fan driven device that is capable of covering up to 10,000 sq. ft of space. Easy to install suspended from the facility ceiling.

Inspired TEC Interventec unit utilizes photo-catalytic oxidation technology that generates advanced oxidation products primarily consisting of hydro-peroxides or vaporized hydrogen peroxide.

Photo catalytic oxidation technology replicates nature's purifying process through the use of ultraviolet energy to activate a multi-metal catalyst converting water vapor into oxidizers. These oxidizers remove hydrogen from the pathogen rendering it inert.

Recommended for food processing facilities, distribution centers, food storage facilities, warehouses, green houses and grow rooms.

FEATURES:

Treats Large Occupied Spaces

Watertight Manufacturing

Powerful Remediation

Low Power Requirements

INTERVENTEC

InspiredTEC,LLC

SPECIFICATIONS & FEATURES

UNIT

- Dimensions: 25" H x 26.5" W x 23.5" D
- Weight: 39 lbs.
- Stainless Steel + Optional Aluminum
- Warranty: 2 year Manufacture's warranty

PERFORMANCE

- Airflow: 262 CFM

POWER

- Input Voltage: 120 VAC/60Hz 230VAC/50Hz
- Operating Voltage : 120 VAC,230 VAC
- Operating Wattage: 143W-274W
- Operating Amperage: 1.43A 2.7A
